

Environmental Policy

Our Approach

At Tacchini, we believe that harmony between people, objects and the environment is the foundation of our identity. The beauty of a product goes beyond its form. It emerges from the care invested in its design, the quality of its materials, respect for craftsmanship, and a sense of responsibility towards the places and communities in which we operate. We recognise that every industrial activity has an environmental impact. For this reason, we are committed to designing, manufacturing and collaborating with our supply chain in ways that progressively reduce these impacts, promoting durability, repairability, material research and the responsible use of resources.

Our Policy

This Environmental Policy is established, implemented and maintained by the Management as part of an Environmental Management System compliant with the UNI EN ISO 14001 standard. It provides the framework for defining environmental objectives aligned with the strategic direction of Tacchini Italia Forniture S.r.l. and with the activities covered by the Environmental Management System.

Through this Policy, we are committed to:

- protecting the environment by preventing pollution and, wherever possible, reducing the environmental impacts associated with our activities, products and services;
- complying with all applicable compliance obligations, including legal, regulatory, contractual and voluntary commitments;
- taking into account significant environmental aspects, as well as the risks and opportunities arising from our context, environmental conditions and stakeholders' expectations;
- continually improving the suitability, adequacy and effectiveness of the Environmental Management System in order to enhance environmental performance;
- defining measurable environmental objectives, monitoring them and reviewing them on a regular basis;
- promoting the efficient use of energy, water, raw materials and packaging, ensuring proper waste management, and monitoring impacts related to suppliers, transportation and the product life cycle;
- engaging everyone working under the Company's control, fostering awareness of their role and their contribution to the Environmental Management System;
- communicating this Policy internally, making it available to interested parties, and ensuring that all environmental information is consistent, reliable and transparent.

Our Environmental Commitment

Our environmental commitment is driven by the sense of responsibility that guides Tacchini in pursuing solutions consistent with its context, the nature of its products, and the environmental impacts the Company can control or influence. We aim to foster a shared journey with employees, suppliers and partners, promoting environmental awareness, responsibility and continuous improvement throughout the product life cycle. To achieve this, we are committed to reducing the consumption of natural and energy resources, preventing pollution, minimising waste and, wherever possible, encouraging the use of materials and solutions with a lower environmental impact.

Through its Environmental Management System, Tacchini is committed to fulfilling its compliance obligations, defining environmental objectives consistent with this Policy, and continuously improving its environmental performance.
